

## **Vista's Hospitalist Partnership**

**Vista Family Medicine** has partnered with Hospitalist groups at both LCOM and Christ Hospitals. A Hospitalist is a board-certified specialist physician who is dedicated to hospital care. We have chosen to partner with them to enhance our inpatient care service.

The Hospitalist will talk with your Vista provider, and jointly develop the care plan during your hospitalization. As the Hospitalists are based in the hospital, they can better and more efficiently respond to changes in your condition or plan.

Your Vista Provider will remain very involved in your care. We will help coordinate any services needed at discharge, and provide your follow-up care.

We are excited by this partnership, and anticipate it will allow us to focus on your greatest needs. We plan to continue to improve our services in chronic disease management (diabetes, hypertension, arthritis, etc), acute care, home care, nursing home care, elder care, and end of life care. As usual, our goal remains to keep you and your family well, and out of the hospital!
